Professional Summary

MERN Stack Developer with 3.5+ years of hands-on experience in building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Proven expertise in developing responsive user interfaces, integrating RESTful APIs, and optimizing performance for scalable, production-grade applications. Experienced in Agile environments, version control with Git, and working collaboratively with cross-functional teams to deliver robust, maintainable software solutions.

Skills

- Languages: JavaScript, TypeScript, HTML, CSS
- Frontend Technologies: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Material UI
- Backend Technologies: Node.js, Express.js, Sequelize, Prisma
- Databases: MongoDB, MySQL, PostgreSQL
- Version Control & PM Tools: Git, GitHub, Bitbucket, JIRA, Trello
- Development Tools: Visual Studio Code, Sublime Text
- Operating Systems: Windows, Linux

Education

GTU, SREZ collage - Computer Science And Engineering Science

2019 – 2022

- CGPA: 8.0

Experience

Software Engineer, Tatva Soft - Rajkot

June 2023 – Present

- MERN Stack Developer at TatvaSoft; gained strong expertise in React.js, focusing on building responsive user interfaces, seamless API integration, component-based architecture, and optimizing frontend performance for scalable web applications.

Jr. Software Engineer, Tri-state Technology - Ahmedabad

June 2022 – June 2023

- Backend Developer at Tristate Technology, focused on scalable APIs, database design, and performance optimization. Played a key role in architecting RESTful services, integrating third-party APIs, and ensuring secure, high-performance backend solutions using Node.js, Express, PostgreSQL, and Sequelize. Collaborated cross-functionally with frontend and QA teams to deliver robust product features in an Agile environment. Contributed to reducing API latency by 30% and improving database efficiency through optimized query design.

Projects

TERRE DES HOMMES SUISSE - TDHS

- Worked on the Terre des Hommes Suisse project, a Swiss NGO platform supporting children's rights across 10 countries. Led backend development and successfully implemented Version 2 with enhanced performance, improved API structure, and secure data management.

LOGGY - CAR MAINTENANCE TRACKER

- Worked as a Backend Developer for Loggy, a free vehicle maintenance tracking app. Designed and developed secure, scalable APIs for managing service logs across multiple vehicle types. Focused on data accuracy, performance, and seamless user experience.

EVENT MANAGEMENT SYSTEM

- Worked as a Full Stack Developer to build key features like event creation, ticket booking/cancellation, and dynamic seating layout. I integrated Nodemailer for email notifications and socket for in app notification and weather forecast APIs. I also developed analytics dashboards using the MongoDB Aggregation Pipeline.

JOB JUNCTION

- Worked as a React Developer on Job Junction, a clone of Upwork focused on connecting freelancers with clients. Developed responsive UI components for job listings, proposals, messaging, and user dashboards. Ensured smooth UX and API integration.
